

FAQs

Q. How many treatments are required?

A. In many cases, following the very 1st treatment, you will see immediate improvements. Often the results are visible 4 weeks after your first treatment. In order to achieve optimal and long-term results, it is recommended to undergo a series of 8-12 treatments with suggested periodic maintenance. These results are achieved in a relatively small number of short, pain-free treatment sessions that require no downtime.

Q. How long do the treatments take and are they safe?

A. Body contouring treatments take approximately 20-60 minutes, depending on the size of the area being treated. These treatments are non-invasive, safe and are pain-free! There is no down time associated with the treatments so you are able to resume your regular activities.

Q. What does the treatment feel like?

A. Radio frequency is a completely non-invasive technology that is painless. During treatment you will feel your skin warm up, without discomfort. Many patients have reported that the treatment feels like a warm massage.

Q. How quickly will I recover?

A. Immediately. The treatment has no downtime and you may resume your daily activities right after your treatment.

Q. Are there any side effects?

A. No. You might experience temporary redness in the treatment area which should pass within several hours.

Why should you choose body contouring with SharpLight

- ▶ Reduced localized fat
- ▶ Highly effective with minimal treatments
- ▶ Non-invasive and safe with no down time
- ▶ Produces slimmer, contoured bodies
- ▶ Clinically proven Radio frequency technology
- ▶ Effective on all skin types
- ▶ Fast and painless treatment
- ▶ Body contouring on all areas, especially on the abdomen, thighs and buttocks

What our Practitioners are Saying:

Orly Zibli
Home of Cosmetics
and Beauty

I own a small aesthetic practice and most of my business comes from body shaping. I chose the Radio frequency technology since treatment with RF is pleasant and comfortable. My patients have been delighted with the results and my business growth has increased dramatically.

Body Contouring

Get into your favorite jeans again

Body contouring using Radio frequency technology

Radio frequency has established itself as a gold standard in non-invasive body contouring. The treatment is highly effective, fast and absolutely painless. In no time you will be able to wear your favourite jeans again!

Loving your body shape

The majority of us struggle when it comes to achieving the body shape we desire. While diet and exercise are critical factors in the process, their main downfall is that they can't target specific body areas. Fortunately, SharpLight's body contouring treatments can! In just a few treatments you can improve your after-birth tummy, or reduce the circumference of your thighs.

Over the last several years, the market demand for non-invasive body contouring solutions has been on a constant rise. In North America alone, 190,000 non-surgical fat reduction treatments were performed this year.

How does it work?

SharpLight's body contouring treatments use multi-polar Radio frequency technology. During the treatment, RF pulses are emitted onto the treatment area. The current targets the subcutaneous fat cells causing them to shrink in size. Simultaneously, the heat causes the collagen fibers to contract resulting in immediate skin tightening. By undergoing several treatments, the body produces new collagen and elastin which provides long-term skin tightening results.

Seeing is Believing

What our Patients are Saying:

“I regularly exercise but I have never been able to reduce the circumference of my thighs. Due to my body build my thighs are especially wide. In just 8 SharpLight treatments, I reduced 5 cm in circumference and this has made all the difference. I couldn't be happier!”

Jessica Gilbert - SharpLight Patient

“Ever since my pregnancy, my stomach has never looked like it used to. SharpLight's body contouring treatment helped me to flatten my stomach and tighten up my love handles. Now I look better than I used to.”
